

Great opportunities for all Life Science Researchers

Dear Customer,

Invitrogen, part of Life Technologies, is pleased to announce that from February 15th, 2010, over 1500 of the most commonly ordered Applied Biosystems[®] and Ambion[®] products currently available from Invitrogen, will also be available to order through Fisher Scientific.

Invitrogen and Fisher Scientific are both leaders in serving the global life science market and helping you achieve your research goals is paramount to us. This new relationship supports that goal by further extending and adding depth to our coverage of this exciting and rapidly growing market. We are very excited about providing you with this new option, delivering added convenience. We believe this expanded capability creates potential to further improve efficiencies in your ordering and administration processes.

All orders/enquiries should be directed to your local Invitrogen/Fisher Scientific Customer Service department.

We look forward to offering you the benefits of this extension of our relationship.

Yours faithfully

Susan Lambert
Vice President & General Manager – Europe
Life Technologies Ltd

David Westwater
Vice President & General Manager – Europe
Fisher Scientific Worldwide

Fisher Scientific is pleased to announce the availability of the following Applied Biosystems & Ambion products:

- **Ambion® RNAi/siRNA Kits**
- **AmpliTaq® PCR Enzymes**
- **SYBR® Green qPCR Reagents**
- **TaqMan® Reagents and Assays**
- **QPCR & PCR Plastics**

The Fisher Scientific team is ready to offer you this new range of high quality products for your research with the outstanding service & distribution you expect.
